

Amendments to the Specification:

1.) Please replace paragraph [0080], beginning on page 16, line 26, with the following rewritten paragraph:

[0080] A preamble signal received by the receiver 42 via the antenna 40 is output to the analyzer 44 which analyzes the preamble signature with respect to e.g. the path loss class associated with this preamble signature. To this end the analyzer ~~[[54]]~~ 44 accesses the database 46 which includes a table associating preamble signatures and path loss classes. The path loss class determined by the analyzer 44 is output to the derivation unit 48 which derives from e.g. an internal look up table a transmit power level for the AI to be transmitted on the DL AICH
